(P-Metric Only) • 16 Sizes Available

Every passenger car produced after September of 2007 is equipped with tire pressure monitoring systems. TPMS manufacturers recommend replacing the valve stem kits with every tire change, since older kits can corrode and cause air leakage (just like traditional valve stems). This represents a growing business opportunity for you, while protecting your customer's investment!

**TPMS Kits & wheel weights available to support your tire business!**
